+ like art, i find belief, like art, difficult to define precisely, but i know it when i see it

+ a belief is defined not so much by the content as by how it is "held" — BS is a kind of mental disease

Science + religion, in the end...

Kosovo,
Serbs/albania/jews/arabs/catholics/protestants/liberals/conservatives/etc are examples of belief in action

Never any value to "believes"
belief, somehow pushes responsibility away from the believer

does that your not a sapk

two overriding factors

1. who was driving imprudently
2. ~~does~~ is right of way granted to cars driving on wrong side of ~~street~~

3 your interpretation of right of way

12,270

right of way is being improperly applied in this situation

right of way concerns situations in which both parties are operating their vehicles in a prudent ~~and safe~~ ~~manner~~ non-aggressive manner in order to facilitate traffic flow and safety

when one of the parties violates the prudence clause ~~and~~ they forfeit the right to claim right of way

I Need a good analogy

her hitting me and claiming right of way is like

* builders - falling balconeys.
"well, they had too many people on it."

12,271

- what is the purpose of right of way
- to facilitate traffic flow / safely in situations where thoughtful, prudent, considerate drivers must negotiate ambiguous possibly colliding paths.

problematic in the absence of such conventions

right of way isn't the only criterion for determining fault in every situation

for instance - drunk driver (A) passes out and crosses highway head-on into a VW full of nuns.

(A) was driving in a place no one would reasonably expect him to be driving

when we drive, we do so with expectations about the behavior of other drivers

the nuns had a right to expect that no one would be driving head-on into them in their lane.

he had no right to have his car in that location

same of B.H.

12,272

right of way applies in ~~which~~
situations where both parties

operating vehicle ~~on~~ outside normal
expectation of prudent others

This car had no right being where it was
right of way has nothing to do
with it.

real driving is about drivers
negotiating space navigation

it depends on everyone doing the
expected / avoiding the unexpected

her car was going too fast in a
place she had no right to be
driving

perhaps i should have opened my sunroof
to make sure no cars were going to fall
on me from the sky.

write to crow guy

I've started by putting ~~a~~ ~~few~~ peanuts openly in my small back yd only about 120 ft x 50 ft.

it's been two days. no crows in my yard yet.

4 or 5 days a week, i go to a nearby cafe (w/ counter) in order to read and write and drink coffee for about 2 hrs.

as I get older, i find i can manage only a couple good hours/day of dynamic creative thinking/strategizing in interested in epistemology/linguistics →

12,318

particularly – relationship between language and intelligence, creativity, problem solving, socialization, "spirituality" etc.

Anyway before is actually go into the cafe I ~~spend~~ has spent between 10-30 min. meditating, relaxing, etc in my car.

behind the restaurant rear parking lot is a large grove (50 trees) of large 50-80 ft trees

in the past ive ~~watched~~ noticed crows in the area in small groups of 2-5 approximately 1/2 the days

occasionally large gathering of 50+

12,3 19

it looked like play time

lately, i've begun to pay closer attention and to a wider physical area

~~2 days~~

as a result of info off your web site, i went to the store and bought a bag of unsalted ~~p~~ unshelled peanuts

my aim is to become friends with the crows
is that an unreasonable aspiration

the next ~~morning~~ afternoon i returned
all the ~~p~~ nuts were gone

- what can i offer them beyond peanuts

12,395

Bob is not rule-bound
Bob uses rules to restrict the field of play... to give rise to distinctions to play (create) with.

"Rules" are invented by H.s.

Maybe humans are the end of evolution for Earth... just the part required for the global brain

a human being is made of smaller living organisms (cells) which are made of molecules

Man, you gotta hand it to them molecules/atoms/quarks they really got it together

is it therefore unreasonable to look for a similar relationship extended upwards to a planetary level

12,396

- WHAT IS IT

TLC cover the 25 lunar cycles

beginning Dec 7 1999 ending Jan 13 2002 -

3 winter solstices includ

new moon preceding winter solstices

the TLC begins + ends

after the lunar cycle, the 29.5 day

365.24 day solar cycle is most obvious

12,480

although the lunar and solar
cycle are incommensurate
with one another, they are not at war
they co-exist nicely
the winter solstice
TLC uses the w.s. ~~d~~ to mark years
the yearly cycle
TLC acknowledges the solar cycle
by beginning and ending it
on the moon which includes
the winter solstice

Recruiting:

you have to look honestly at yourself and your intentions

- will you be satisfied if you had the things that most people appear to seek

money, sex, acclaim, houses, cars, family, children, happiness or ecstacy

OR do you want more things than people say think/etc they want

mental space is getting very crowded with info
